

# Primary Separator type PS-1

You have to separate bulky waste into smaller fractions? So, you need a flat separator PS-1

## Application Area:

- Domestic waste
- Old and used wood
- Pallets and cable drums
- Tree roots and stems
- Mixed wood
- Slags of irons and non-ferrous metals
- Construction waste
- Automobile tyres

## Benefits:

- High productivity
- Maintenance friendly
- Alarm switching off
- Low wear and tear of working rollers
- Possibility of rollers drive replacement .

## Technical Data:

Model	PS-1
Type	stationary
Drive	Electric drive
Productivity, kW	5,5
Productivity, t/h	8-12
Size of material to be discharged, mm	до 400
Size of discharged material, mm	до 80
Frequency of shafts rotation, min	160
Exploiting width, mm	2100
Exploiting height, mm	3500
Exploiting length, mm	3800
Control	Electric box of control
Weight, t	3,0

## Additional Equipment:

- We can also manufacture various separators on your inquiry with electric or diesel drive with additional transporters for fractional separation.
- We can also install magnet belt separator for shredding of metallic parts
- Possibility to modificate and complete equipment on client's demand

## JV OLNOVA provides:

- Engineering
- Production
- Putting into operation
- Personnel training
- Guarantee and post guarantee servicing
- Supply of spare and component part
